

## Tactical Firearm Instruction

THE CONSTITUTION GIVES YOU THE **RIGHT**.

YOUR LOVED ONES GIVE YOU THE **REASON**.

WE GIVE YOU THE SKILLS TO USE IT **RESPONSIBLY**.

Owning a firearm won't make you safer. Unless, that is, you know how to use it safely and effectively. Our training classes are designed to take you from any level of proficiency (even, in fact, if you've never fired a gun in your life) to give you the skills and understanding to maintain and deploy it safely in defense of your life or

those of your loved ones. Our faculty is made up of the same instructors who teach and certify Federal agents, SWAT teams, and private sector security professionals. Simply stated, it's the highest quality training you'll find anywhere in the country. But why trust your safety ~ or your family's safety ~ to anything less?

# ZERO to 60 Tactical Firearm Instruction

## COURSE DESIGN

Each module includes two hours of live-fire training, a one-hour lunch & learn, followed by two additional hours of live-fire training. Lunch and learn topics include: the legalities of use of force; critical stress management; wounds and ballistics; concealed carry laws; psychological and physiological conditioning; and aftermath preparation.

### Introduction to the Tactical Handgun Module 1

This course of instruction will give you a comprehensive understanding of firearm safety, gun handling, and marksmanship, as well as a working knowledge of fundamental firearm theory as it pertains to personal defense. Gun calibers and firearm ballistics, proper gun selection and safe gun ownership will be examined, including live ballistics demonstrations.

Prerequisites: None

### Concealed Carry & Deployment Module 2

This course builds upon your basic firearm handling skills; teaching you how to carry and deploy a firearm from a concealed carry. You'll also learn the fundamentals of defensive shooting and tactical reloading.

Legal implications of firearms usage, use of force laws, and concealed carry issues will be discussed and examined.

Prerequisites: Module 1 or Waiver

### Advanced Tactical Shooting & Aftermath Module 3

Defensive shooting as an aspect of advanced handgun use including: extreme close range shooting; prioritizing and engaging multiple aggressors; shooting and reloading on the move; use of cover; alternate and unusual shooting positions; speed shooting and failure-to-fire action drills.

We'll also discuss critical incident aftermath preparation and protocols—what you need to expect physically, psychologically and emotionally, following a lethal force scenario, and how to protect yourself before, during, and after the incident.

Prerequisites: Modules 1 & 2, or waiver

### Urban Tactics & Critical Stress Management Module 4

This course teaches the fundamentals of close quarters, urban environment gun handling and defensive shooting. Included are skills in; Moving and shooting in indoor, urban environments, how to enter rooms, and move down hallways, single-hand shooting, off-hand shooting, and single-hand reloading. We will also examine how to cope with the effects of adrenalin, control panic, and how to develop the mindset necessary to engage in and survive a lethal force encounter.

Common effects of adrenal stress will be simulated including: tunnel vision, elevated heart rate, and auditory exclusion, and methods to manage and minimize the negative impact of adrenalin will be explained.

Prerequisites: Modules 1 - 3, or waiver

### Real World Simulation Module 5

This is where the "rubber meets the road."

Experience a variety of real world, real life scenarios simulating live shoot/no-shoot situations. You will have to make critical decisions and manage the consequences. All of your skills will be put to the test. Simulations may involve any type of real world situations such as road rage, carjacking, ATM's, robberies, home invasions, etc.

To conduct this course of instruction, individuals will engage a simulation using highly realistic marking cartridge projectile guns. Your performance will be video-taped, and evaluated following the exercise. DVD Copies of your simulation will be available, following the day's activities.

This will be one of the most exciting, and educational training experiences you will ever have.  
We guarantee it!

Prerequisites: Modules 1-4, or waiver

"These guys are true specialists. I've been an avid shooter my whole life and I was truly impressed with how much I learned in such a short period of time. I'm especially impressed with how well they teach beginners. I prompted my wife to go through the course and she not only learned a lot, but she truly enjoyed the experience! I would highly recommend INPAX to anyone looking to greatly improve their skills or learn to handle a gun for the first time." R.M.
